

T-Slot Slider 8 80x40, Fastening Set Floating Bearing

Product number ZI-1887

Weight 0.017kg

Product description

The sliding carriage guide 8 40x80 turns the profile groove 8 into a guide. of a stable sliding carriage element.

Sliding elements made of glideable plastic realise a low-wear linear linear movement, which does not need to be lubricated.

The slide body made of high-strength GD-ZN transfers the load force into the profile groove.

Attachment elements are screwed to the guide using the M6 nuts provided.
