Product description

Profiles 8 are suitable for assemblies of all kinds. Due to the different profile geometries, the material requirements can be adapted to the application. The grooves and the core holes of the profiles 8 are designed for M8 screws. Clamping profiles are used to build large and stable protective panels. The panel elements are screwed together with cylinder head screws and clamping strips. The direct screwing of the panel element supports the stability of the panel. Panel size: clear inside dimension +30.0 mm
Cut to size max. 6000 mm
